

INDUSTRIAL WAREHOUSE

Markle, IN

LOSS TYPE: COMMERCIAL FACILITY RESTORATIVE CLEANING

DAMAGE: The walls, ceilings, floors, doors, inside components, offices and bathrooms of a 19,200 sf Industrial Facility needed Restorative Cleaning

THE SITUATION

PROTECHS INC. was contacted by the owners of a large building to get some insight on how to clean and restore the building to make it acceptable for a new tenant.

THE PROBLEM

The previous tenant had been at the facility for over 12 years and specialized in custom fabrication trucks which included applying specific coatings.

THE SOLUTION

PROTECHS Project Managers did a walk through with the owners to better understand their expectations. We performed multiple sample test cleans on various surfaces throughout the facility. After the owners examined our test cleaning, Protechs was awarded the contract and completely restored the building. The owners' expectations were met in line with their timeframe they needed.
